

BDFE has updated the e-Payroll and Labor Distribution Reporting website with a mobile friendly look and feel due to a federal initiative. This initiative requests that all government web pages move towards being accessible and functional on tablets and smart phones.

With the existing website, all the links were on the front page.

Existing Non-mobile page

New Mobile friendly page

With the new page, there is a tab for each subject matter. Click on the Discoverer tab and there are the links to Discoverer Viewer and Discoverer Plus. From this point forward, everything will have the same look and feel. The Discoverer application itself is not mobile ready so you will have to scroll and possibly zoom in and out to see the data when viewing on a smart phone.

This is what the website will look like on a smart phone.

This is what the discoverer viewer will look like on a smart phone.
